Sec. 17-276. Operation of emergency medical services vehicles; permit required.

(a) As of January 1, 2011, it shall be unlawful for any person to transport a patient in an emergency medical services vehicle without holding a valid city permit. This section shall not apply to the following:

- (1) Any transport of patients originating outside the city and terminating in the city;

(2/1/18)

(d) A violation of this section shall be a misdemeanor and may also, at the option of the city, be enforced by equitable relief in Circuit Court. To the extent such equitable relief is sought, the city may recover reasonable attorneys' fees.

(G.O. 2424, 4-4-11)

Sec. 17-277. Application and awarding of permits.

(a) Any person desiring to apply for a permit to operate an emergency medical services vehicle within the city shall file an application with the city's director of health. Along with such application, the applicant shall provide documentation of organization and corporate structure, an attestation as to the competency and fitness of the applicant (and/or its officers/directors/employees), and evidence of a valid Missouri ambulance license from the Missouri Department of Health. In addition, the application shall contain the following information, in a form reasonably approved by the director of health:

- (1) The proposed area and level of service; hours of operation; the initial number of emergency service vehicles; an estimate of necessary equipment and supplies;
- (2) An outline of the financial feasibility of the proposed service (including initial source of funds, adequacy of sources of future revenue, and a proposed first year budget with sufficient detail to allow for a reasonable assessment of the financial stability of the applicant to provide the proposed service and the financial feasibility of the proposal); and
- (3) Other pertinent operational aspects of the proposed service as determined by the director of health.

Only applications fully completed with all required documentation shall be considered by

the director of health.

(b) In determining whether to award a permit, the director of health shall consider all information submitted, together with the following:

- (1) The ability and quality of existing emergency medical services within the proposed service area;
- (2) Response times of existing emergency medical services in the proposed service area;
- (3) Minimum numbers of personnel and staffed emergency service vehicles for the proposed service; and
- (4) Potential negative (clinical, operational, fiscal) impacts of the proposed new service on existing city services.

(c) Upon review and approval of an application, the director of health shall award a permit for the operation of emergency medical service vehicles, subject to such public health, safety, and general welfare requirements as it may impose under this article. Specifically, each applicant for an emergency medical services vehicle permit shall be required to provide emergency medical services coverage to all individuals within the city limits, 24 hours per day, 365 days per year. In addition, each applicant shall be required to respond to a call, to transport, to render first aid treatment, or otherwise provide services originating within the city, as may be reasonably necessary, regardless of a patient's inability to pay for such services and regardless of the patient's location within the city, unless there is a reasonable cause for provider's emergency medical services vehicles being unavailable (as determined by the director of health). The award of a permit may be further conditioned upon the attainment of norms for quality of care and response times that the director of health and/or the city establishes, from time to time, for the city's emergency medical services system generally, and which are consistent with the then current national benchmarks.

(d) A non-waivable, non-refundable application fee of \$2,500.00 shall be submitted to the city, in conjunction with the application itself,

§17-362

(f) No permit may be transferred by any means, except to a successor entity under which there is no change in ownership or control.
(G.O. 2424, 4-4-11)

All authorized providers under this article shall be coordinated from the emergency medical services dispatch center designated by the city. No authorized provider shall publish or advertise any telephone number for the purpose of receiving requests for emergency response services except the emergency number (911) of the emergency medical services dispatch center.
(G.O. 2424, 4-4-11)

Sec. 17-279. System-wide medical direction.

The medical director shall be a licensed physician and possess the qualifications contained in the Missouri Code of State Regulations, as more specifically set out in the Rules of the Department of Health and Senior Services, Title 19, Division 30, Chapter 40, Section 303 (19 CSR 30-40.303).

- (5) Overseeing the development and administration of written and practical tests for the determination of emergency medical services personnel, first responders, and emergency medical services dispatch center personnel for the purpose of ensuring that all certified personnel who participate in pre-hospital patient care and emergency medical services dispatch maintain knowledge and skill levels at least consistent with industry standards and with that needed to implement emergency medical services system protocols and standing orders.

(G.O. 2424, 4-4-11)

Sec. 17-280. Suspension of authorization to operate.

The director of health may summarily and indefinitely suspend any permit issued pursuant to this article for any reason involving a danger to public health, safety or welfare, including bankruptcy or insolvency. Grounds for suspension shall include, but are not limited to:

- (1) Failure to provide emergency medical services coverage to individuals within the city limits, 24 hours per day, 365 days per year;
- (2) Failure to respond to a call, to transport, or to render first aid treatment, as may be reasonably necessary;
- (3) Refusal or failure to provide services originating within the city because of a patient's inability to pay for such services, because a patient is located at a particular location within the city, or because the provider's emergency medical services vehicles are unavailable without reasonable cause (as determined by the director of health); and
- (4) Failure to meet the norms for quality of care and response times established by the director of health and/or the city from time to time, and which are consistent with the then current national benchmarks.

(2/1/18)

(G.O. 2424, 4-4-11)

Any such appeal shall be in writing and state the name and address of the appealing party and the nature of his/her/its appeal, and shall be made within ten (10) working days after the denial, revocation, suspension or charge.

(b) The director of health shall hold a public hearing within ten working days after notice of appeal is filed.
