

### *Park Rules & Descriptions*

**HERITAGE PARK** Softball Complex is a, "state-of-the-art" park with many great ammenities. Below you will find an in-depth description of the park along with the rules for the complex.

- ❖ Four of the fields are 300', while the fifth field is 250'. All fields are fully irrigated by an on-site well which will keep the Blue Grass/Sports Fescue outfields watered. All dugouts are 30' covered areas, which include player seating, bat racks and a line-up board. Each field is also equipped with a 20' backstop with padding along the bottom. Field 4 has a press box and a championship style scoreboard. The other four fields have a scorer's table and smaller scoreboards.
- ❖ All five fields have "championship level" MUSCO lighting system. This state-of-the-art system will make night play more enjoyable and safe. These lights will be illuminating infields made up of existing sand, clay and imported west Texas Red Clay.
- ❖ The complex is completely fenced for security and safety. Each field is encompassed by a 6' fence with the outfield fences all having a safety top-cap (yellow) along with wind screens on all fields. There are ample warm-up areas located between fields 3 & 4 and 4 & 5. Water fountains are located between fields 1 & 5 and behind the backstop of field 3. Fields 1, 2, 3 & 5 have a "shade" structure behind each backstop. This 20' x 20' shaded area which covers the scorers table and middle section of bleachers will enable spectator's relief from the sun.
- ❖ Fields 1, 2 & 5 have seating for 100 spectators, while field 3 has seating for 230. Field 4, which is also known as the Championship Field has over 400 permanent, chair-backed seats with an additional 1,200 being able to be seated in the bleachers.
- ❖ Heritage Park also has a 2,200-sq. ft. covered and fenced playground complex. This system features many play areas along with a safety "rubber" floor. Two large umbrellas along with a misting "cooling" station are located in the park.
- ❖ The center pavilion area will be a very special part of the park. This center building has 7,000 square feet including seating with tables for over 150 people. The pavilion, which is equipped with ceiling fans, video games, televisions with satellite service will be a great area to enjoy in and around play at the park. The west end of the pavilion is a full-service concession area, which will serve sandwiches, appetizers, snacks and beverages, including beer. The east end of the pavilion will house the complex office along with sufficient, modern rest room facilities.
- ❖ The main entrance to the park is on the north side of the complex adjacent to the nearly 300 paved, lit parking spaces.
