COVID-19 VACCINE DASHBOARD

[HTTPS://COVIDVACCINE.MO.GOV/DATA/](https://COVIDVACCINE.MO.GOV/DATA/)

County Name	Total Doses Administered (Includes first and second doses)	Number of people who have initiated vaccination	Number of people who have completed vaccination	Percent of population initiating vaccination	Percent of population completing vaccination	Doses Administered in past seven days
Buchanan	25,377	15,624	10,617	17.9%	12.2%	1,014

COVID-19 Vaccinations in Missouri

Overall Vaccinations in Missouri

This dashboard was last updated on 4/19/2021 and contains data on vaccinations administered through 4/18/2021. Historical numbers, especially over the most recent few days, will update as providers report data to the state. Differences between this dashboard's numbers and those on CDC's dashboard are primarily due to timing.

Total doses administered (includes first and second doses)

3,410,665

Number of people who have initiated vaccination

2,101,443

Number of people who have completed vaccination

1,425,312

Share of population who has initiated vaccination

34.2%

(23.2% have completed vaccination)

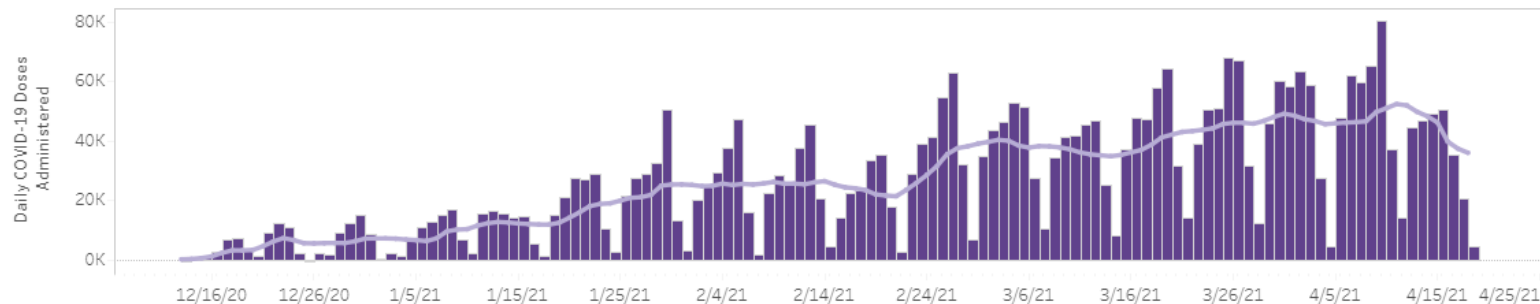

Doses administered in past 7 days (4/10/2021 through 4/16/2021)

277,337

(average of 39,620 per day)

Doses Administered Over Time

Line represents 7-day average. Note that data from the most recent days may be incomplete because of delays in reporting.

BUCHANAN COUNTY COVID-19 VACCINATION LOCATIONS

IMPORTANT NOTES:

**Please note that these locations are not guaranteed to have vaccine available at all times.

The City of St. Joseph Health Department does not have specifics on the vaccination process at these locations. Please visit their websites or call for more details.**

BUCHANAN COUNTY TESTING POSITIVITY RATE

APRIL 4-14, 2021

COVID-19 IN BUCHANAN COUNTY

	Total Cases	Confirmed Cases	Probable Cases	Deaths	Positivity Rate
Total Count	10,309	7,231	3,078	180	3.76%
Change Since Last Report	+7	+3	+4	0	N/A

Confirmed case: The case meets the confirmed laboratory evidence, which is the detection of SARS-CoV-2 RNA in a clinical specimen using an approved detection test verified by a certified testing laboratory.

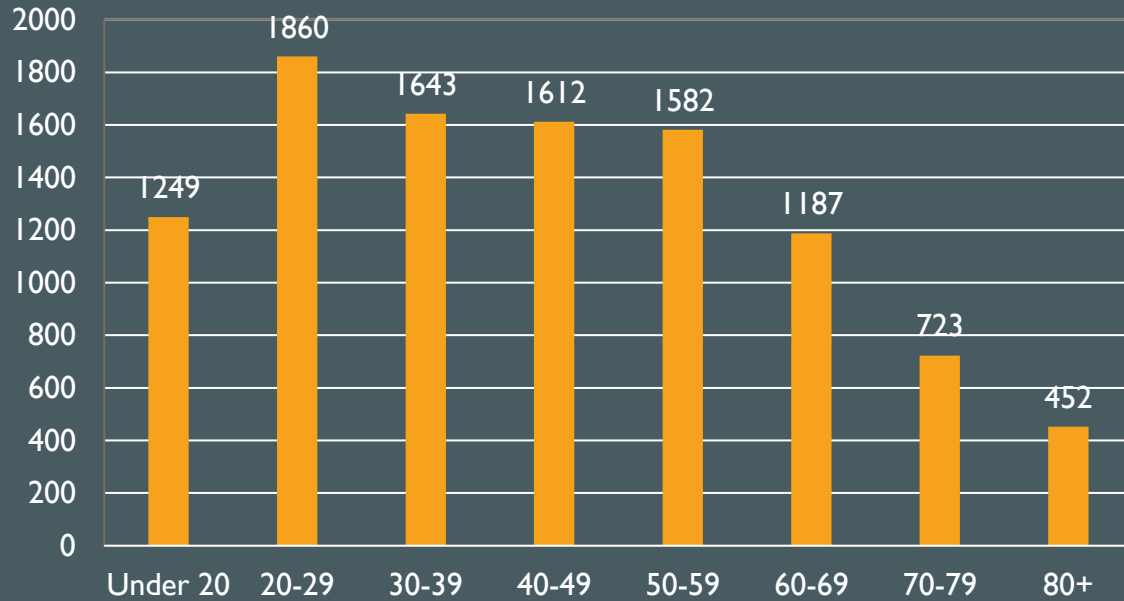

Probable case: The case meets clinical criteria AND epidemiologic evidence (close contact with a confirmed or probable case; travel to or residence in an area with sustained, ongoing community spread; or a member of a risk cohort as defined by public health authorities during an outbreak), with no confirmatory laboratory testing performed for COVID-19.

Positivity Rate - The 7-day positivity rate is based on PCR and Antigen testing rates for Buchanan County residents and will be updated once a week on Mondays.

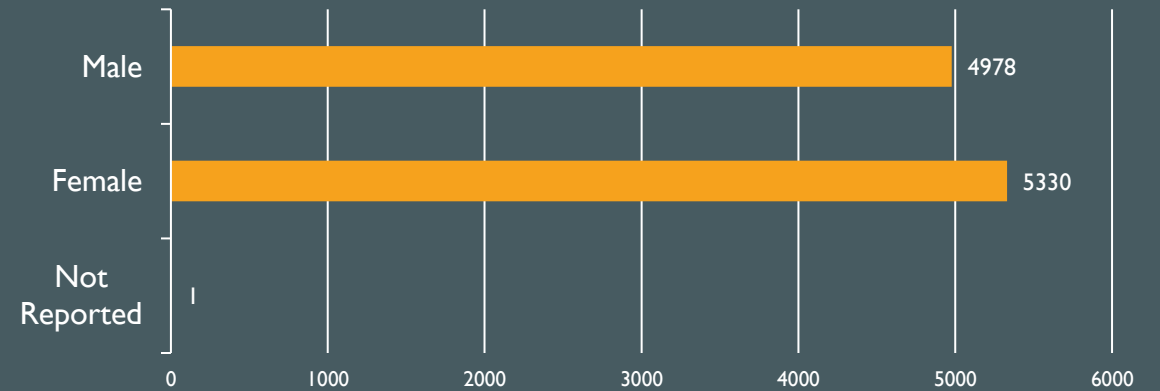

Currently Hospitalized – Mosaic Daily Inpatient Update: COVID-19 patient count is minimal. If the Mosaic system has more than ten COVID-19 inpatients, their website will be updated <https://www.mymc.com/General/coronavirus-covid-19/#DailyInpatientUpdate>.

This chart shows the number of new positive COVID-19 cases per day. The straight line indicates the trend.

BUCHANAN COUNTY 14-DAY TREND

This is the number of new cases over the past 14 days.

The straight line shows the trend of new cases.

COVID-19 IN MISSOURI

Missouri COVID-19 Dashboard will provide COVID-19 data for state and county levels:

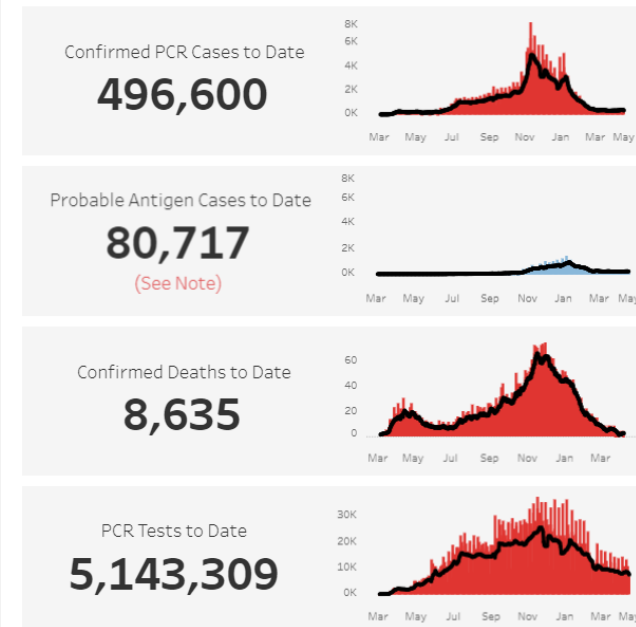

MO DHSS numbers have fluctuated since Friday as the state makes adjustments to ensure COVID-19 cases are not counted twice. This could occur if a person received a positive antigen test followed up with a confirmatory PCR test – initially some people who fall into that category were counted in both. In order to report accurately, the state regularly reviews positive tests and corrects the numbers.

COVID-19 in Missouri

NOTE on dates: This dashboard was last updated on the morning of **4/19/2021** and includes data reported through **4/18/2021**. All 7-day metrics are based on the date a test or death occurred, and are subject to a 3-day delay to ensure data are accurate and complete. See FAQ for details.
Range for 7-Day metrics: 4/10/2021 through 4/16/2021

Note: Please see our "Details about Metrics" page for a message regarding Pettis County data.

COVID-19 in Missouri to Date

COVID-19 in Missouri - Past 7 Days (based on date of occurrence)

Metric	4/16	4/15	4/14	4/13	4/12	4/11	4/10
Confirmed PCR Cases: Past 7 Days 2,352 (daily avg. of 336)	194	312	336	417	534	266	293
Probable Antigen Cases: Past 7 Days 1,464 (daily avg. of 209)	179	191	247	290	258	163	136
Confirmed Deaths: Past 7 Days 10 (see note)	0	4	2	2	1	1	
PCR Tests: Past 7 Days 52,025 (total daily avg. of 7,432)	4,792	6,593	8,040	10,959	13,282	3,990	4,369

COVID-19

Worldwide as of April 19, 2021

Total Cases: 141,057,106

Total Deaths: 3,015,043

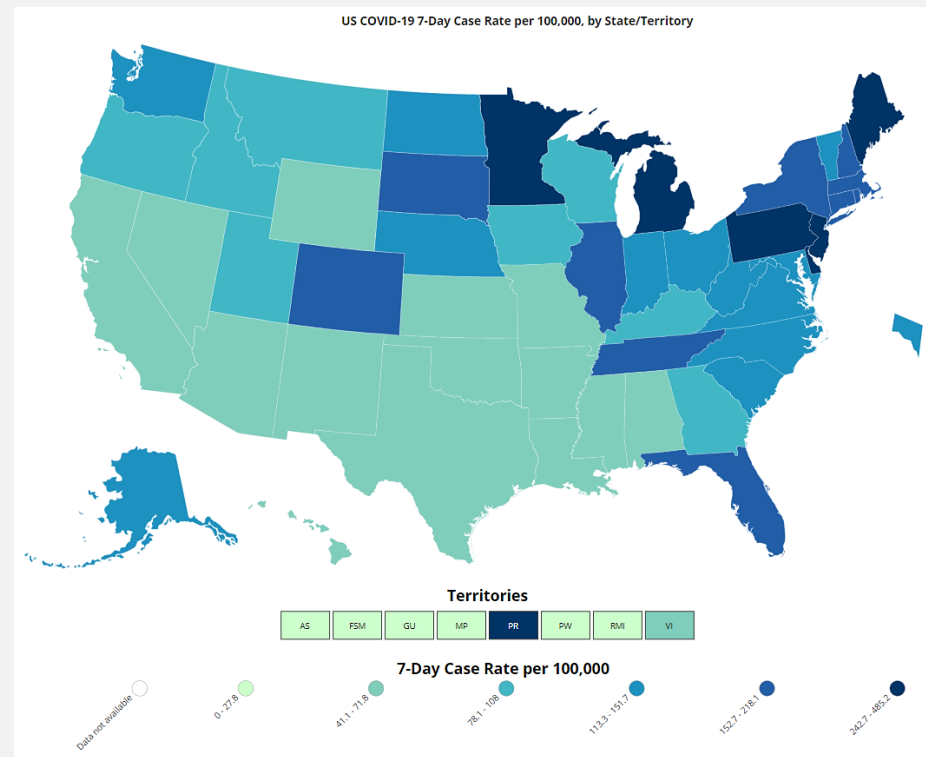

You likely notice a difference in the case counts if you are following other organizations, such as Johns Hopkins. The CDC updates case totals each day, reporting the cases numbers from the previous day. Other sites use sources for real time counts.

United States as of April 19, 2021

Total Cases: 31,484,148

Total Deaths: 564,292
